IEEE Geoscience and Remote Sensing  
2013 Best Reviewers

The IEEE Geoscience and Remote Sensing Letters has been rewarding annually its five best reviewers since 2010. This recognition takes into account timeliness, quality and number of reviews. It is a way of saying “Thank you” to those who stand out and help us delivering high impact and fast core contributions to our community. As always, coming to only five names was a difficult task—we have formed an excellent community of reviewers, but we finally came to the following list.
